

July 7, 2006

Dear EDW 749 Advanced Placement (AP) Java Programming for Educators participant,

This letter is to confirm your registration in the class EDW 749 Advanced Placement (AP) Java Programming for Educators, which will be held at Millersville University in Caputo Hall room 131 from 8:30am to 12:00 (break for lunch) then 1:00 to 4:30pm with Dr. Roger Webster the week of July 24-28, 2006. Attached to this letter is some introductory information, a map of the campus and a parking ticket to put on your car during our session.

This workshop will cover the beginning components of the Advanced Placement (AP) requirements for Computer Science Exam in Java. This course will provide educators with effective course materials in computer science that will help high-school students to pass the Advanced Placement™ (AP) Computer Science College Board exams in Java. Participants will design and write simple Java programs. Topics include: Using Javac, using the Java Development Kit, Object Oriented programming in Java, Java class methods, Java Objects, Control statements, Arrays, Recursion, Using Abstract Data Types, Implementing Abstract Data Types, Stacks, Linked Lists, Queues, Files, and simple Java applets. Straightforward techniques teach participants how to convert their elementary C++ programs to Java. This course will provide clear, practical explanations to guide teachers through the initial AP Java programming topics.

This class is intended primarily for secondary teachers who teach computer programming, the AP Computer Science course or any teacher who wants to learn how to program in Java. The prerequisite for the class is: Prior computer programming experience (not necessarily in Java) or permission from the Instructor. This course will meet for 37.5 hours and will be graded on a Pass/Fail basis.

The web site for our session is: <http://cs.millersville.edu/~webster/edw749/>.

My web page is: <http://cs.millersville.edu/~webster/>

See you there!

Sincerely,

Roger Webster, Ph.D.
