CSCI 380: Operating Systems

William K. Killian

Fall 2018

E-mail: william.killian@millersville.edu  Lecture: TR 1:10PM – 3:00PM
Web: cs.millersville.edu/~wkillian  Classroom: Roddy 256

Office Hours:
Lecture: TR 1:10PM – 3:00PM
Web: cs.millersville.edu/~wkillian  Classroom: Roddy 256

Office: Roddy 141
Lab: Caputo 131 (Mac Lab)

Course Description

Design and implementation of operating systems including types of operating systems, file systems, resource management, concurrent processes, deadlocks, memory management techniques, processor scheduling, disk scheduling, operating system security and system administration. Students expected to develop significant operating systems programming projects.

Course Outcomes

1. Be capable of describing the state diagram of processes, provide code for creating and destroying processes, understand the fork-join process model, and be able to use inter-process communication.

2. Know the difference between processes and threads, how threads are created and destroyed, gain experience with at least one threading library

3. Have theory and application of various concurrency concepts: mutual exclusion, synchronization, and semaphores

4. Implement concurrency components (mutex, semaphore) and apply them in related applications/problems where deadlock must be avoided

5. Able to describe how an operating system manages memory at two main levels: the system-hardware level (paging, segmentation) as well as the resource management level (malloc, free).

6. Explain in detail about virtual memory, paging, segmentation

7. Describe how malloc/free could be implemented theoretically and through a laboratory assignment

8. Understand (describe and implement) several different types of process scheduling algorithms and their tradeoffs.
9. Implement simple services for UNIX (e.g. a proxy server) which leverages sockets, handles, pipes, etc
10. Implement a simple UNIX-like shell
11. Become familiar with tasks of a system administrator on various platforms.
12. Become familiar with security issues related to system protection.

Course Policies

Responses

I will respond to emails within 24 hours unless an exception is noted through email, D2L, or in class. Please note that this means if you email me the night before an exam or assignment submission, I am not guaranteed to respond. Start labs when they are assigned.

Announcements

I will frequently post announcements and new/additional material on D2L and optionally the course website. Read over it by the date indicated on the announcement. Under inclement weather, due dates may be pushed back or changed at my discretion, so please pay attention to all announcements.

D2L (Desire2Learn)

Link to D2L I will primarily use D2L as the grade portal for classes. The submission portion will also be leveraged for homework assignments. Lecture material and notes are accessible through the course website (found on my homepage).

Piazza

Link to Piazza Course Page I highly encourage the use of Piazza to ask any questions that you may have about the course assignments or content. This allows both fellow students and me the opportunity to share common knowledge with all other students. Please refrain from asking specific questions regarding a specific solution to an assignment. Instead, create another example if you can. Naturally, clarification questions are encouraged. Check Piazza for an answer before contacting me.

Office Hours

I hold office hours for your benefit. Please do not hesitate to show up to office hours! If you find that my office hours do not fit your schedule, let me know so we can arrange for a time that does work.
My Expectations of Students

- Arrive prepared and on time for class
- Engage in active discussion during lecture
- Ask questions. Do not hesitate to clarify a concept
- Do your best work and be confident in your abilities
- Check email frequently for announcements and additional information
- Adhere to Millersville University’s Academic Honesty Guidelines

Lecture

Attendance of the lecture is mandatory. I encourage everyone to make an active attempt toward participating. There are times where many examples throughout the lecture are better suited to be done with pen and paper. Please refrain from using your computer for any other reason than note-taking for the class. I also do not expect to see any mobile phones in use during class. I will ask you to leave my class if I observe misuse of technology.

Laboratory

Attendance of any laboratory component is also mandatory. Assignments will be given and will most likely take more time to complete than the lab period. You are permitted to leave the lab period if and only if you have completed the assignment.

Grading Policy

- 40% of your grade will be determined by two examinations (20% each).
- 60% of your grade will be determined by labs, analysis, and homework assignments
- Up to 2% will be added to your grade at the professor’s discretion based on active participation during lecture and laboratory periods.

I will grade on a ten-point grading scale. I will not round any grades. An 89.51 will be classified as a B+

<table>
<thead>
<tr>
<th>Grade</th>

<th>B+</th>
<th>B</th>
<th>B-</th>
<th>C+</th>
<th>C</th>
<th>C-</th>
<th>D+</th>
<th>D</th>
<th>D-</th>
<th>F</th>
</tr>
</thead>
<tbody>
<tr>
<td>Score</td>
<td>≥ 93</td>
<td>≥ 90</td>
<td>≥ 87</td>
<td>≥ 83</td>
<td>≥ 80</td>
<td>≥ 77</td>
<td>≥ 73</td>
<td>≥ 70</td>
<td>≥ 67</td>
<td>≥ 63</td>
<td>≥ 60</td>
<td>&lt; 60</td>
</tr>
</tbody>
</table>

You must attempt all examinations and assignments to pass the course.

Labs

Labs will have a grading turnaround time of one (1) week from the due date. Lab grades can only be contested for up to one week from when the grade is posted on Desire2Learn. Three grace days will be provided throughout the semester without penalty. Otherwise, no late submissions will be permitted.
Exams

Exams will be graded by the next class (e.g. Tuesday-Thursday class with a test on Thursday will have the tests returned the immediately following Tuesday. Monday-Wednesday-Friday class with a test on Friday will have the tests returned the immediately following Monday). You do not get to keep your exams. Failure to return an exam will result in an updated grade of zero (0). I will hand them out in class and go over any answers, but I will collect them at the end of the class period.

University Policies

Academic Dishonesty Policy

Copying or extensive collaboration on assignments is not permitted and may result in failure of the course and expulsion from the University. You may discuss approaches to solving a problem, as long as the discussion remains above the level of detail expected for the course. You may also seek aid in resolving compiler messages. However, if you copy a code fragment verbatim, you are likely committing academic dishonesty. If you copy a code fragment and rename variables, you are likely committing academic dishonesty. Obtaining a solution on the Internet or elsewhere and submitting it as your own work is plagiarism and will result in severe disciplinary measures. Be sure you can explain every line of every program you submit. Writing code is no different than writing a paper — if it was not your original idea, then you should not submit it as your own work.

Title IX

Millersville University and its faculty are committed to assuring a safe and productive educational environment for all students. In order to meet this commitment, comply with Title IX of the Education Amendments of 1972, 20 U.S.C. §1681, et seq., and act in accordance with guidance from the Office for Civil Rights, the University requires faculty members to report to the University’s Title IX Coordinator incidents of sexual violence shared by students. The only exceptions to the faculty member’s reporting obligation are when incidents of sexual violence are communicated by a student during a classroom discussion, in a writing assignment for a class, or as part of a University-approved research project. Faculty members are obligated to report to the person designated in the University Protection of Minors policy incidents of sexual violence or any other abuse of a student who was, or is, a child (a person under 18 years of age) when the abuse allegedly occurred.

Information regarding the reporting of sexual violence, and the resources that are available to victims of sexual violence, is available at http://www.millersville.edu/sexualviolence/index.php

Counseling Resources

Students sometimes face mental health or drug/alcohol challenges in their academic careers that interfere with their academic performance and goals. Millersville University is a caring community and resources are available to assist students who are dealing with problems. The Counseling Center (717-871-7821) is an important resource for both mental health and substance abuse issues. Additional resources include: Health Services (871-5250), Center for Health Education & Promotion (871- 4141), Campus Ministries, and Learning Services (717-871-5554).
Planned Course Schedule

Week 01, 08/27 - 08/31: UNIX & Processes §8

Week 02, 09/03 - 09/07: Processes & Signals §8

Week 03, 09/10 - 09/14: Virtual Memory / Memory Mapping §9

Week 04, 09/17 - 09/21: Virtual Memory / Memory Mapping §9

Week 05, 09/24 - 09/28: System I/O §10

Week 06, 10/01 - 10/05: Networking Primitives §11

Week 07, 10/08 - 10/12: Concurrency Primitives §12

Week 08, 10/15 - 10/19: Midterm

Week 09, 10/22 - 10/26: Threads

Week 10, 10/29 - 11/02: Threads

Week 11, 11/05 - 11/09: Thread-Safe Data Structures

Week 12, 11/12 - 11/16: Threading Libraries

Week 13, 11/19 - 11/23: File Systems

Week 14, 11/26 - 11/30: File Systems

Week 15, 12/03 - 12/07: Tying it all Together

Week 16, 12/10 - 12/14: Review, Final Exam

---

1Subject to change
My Teaching Philosophy

First and foremost, as an educator my primary role is to support students’ well being. This includes but is not limited to physical, mental, and emotional health. I am here to help develop students into outstanding individuals. From the academic side, I will teach key concepts related to the computer science curriculum. From the advisement side, I will support students to achieve success.

Teaching Methods

I will challenge students to do the absolute best work they are able to do, even if they may not have the confidence in their own abilities. I am a proponent of providing captivating lectures through consistent interaction with students and building up lectures as miniature case studies. This methodology molds well to the computer science curriculum since problem solving is a core component of the foundations of computer science.

Practical Skills

In addition to the required course materials covered, I will also cover other practical industry skills. Knowing the theory of computer science is important, but knowing how to leverage that knowledge in industry, academia, or a business setting is also just as crucial. Through the incorporation of real-life application to my lectures, it is my goal that students feel more empowered and ready for any post-graduate position they may pursue.

Self Determinism

I believe that everyone is capable of achieving greatness. Some concepts will be harder to grasp than others, but I will do my best to engage your mind. I also believe in self mastery. Self mastery does not mean that you will be an expert at everything you do. Instead, self mastery focuses on understanding yourself, specifically your thought process, learning process, and how you react to external events. You should know your strengths and your weaknesses — embrace your strengths and improve upon your weaknesses. Everyone learns in different ways. Even if you may not enjoy the material covered in my lectures, I will do my best to help expand and explore your self-awareness.

Work-Life Balance

I know the majority of students are commuting and work part time jobs. When I was a student (here, at Millersville), I also fit into this category. I understand that you wear many hats in your day-to-day life, but I also expect that you will be able to establish a good school-work-life balance. This can be a bit tricky in the beginnings of your college career, but I believe in you! If you want any examples of what to do (and not to do) I can speak from my own experiences — in no way was I an ideal student.
